A Patch of Green-Sydney Sharpe 2002 The Wiebo Ludwig affair brought to the forefront the often explosive relationship between the oil and gas industry and the ranchers and farmers who live under the shadow of its rigs. But behind the headlines, an unreported sea-change is taking place in the long history of these very different players. Canada's petroleum industry is in the middle of a massive paradigm shift. The old focus of drill fast, pump profits, leave quick is long gone. New executives and directors are bringing a mentality of corporate and social responsibility to the industry that pays attention to a triple bottom line: environmental, social, and economic. A Patch of Green examines the forces that have come to bear to bring about this change. From the viewpoints of environmentalists, landowners, drill workers and corporate executives, veteran journalist Sydney Sharpe reveals an industry wrestling with the excesses of its past and learning to profit from a new economic future.

The Central African Republic-Thomas E. O'toole 2019-07-11 A small, poor, little-known nation, the Central African Republic has had a troubled history, from the days of slave raids by Arab-speaking peoples from the north, through the bizarre rule of Jean-Bedel Bokassa, to the present military regime. Landlocked and possessing few resources beyond its famed diamonds, it is one of the least developed nations in Africa. Since its independence from France in 1959, it has of necessity continued to depend on its former colonial ruler. In this introduction to the Central African Republic, Dr.

O'Toole examines the country's tumultuous past and current difficulties, the nature of the present political situation, and the roots of that situation in the colonial and precolonial periods. He also focuses on the roles of ethnicity, emerging urban problems, class formation, education, and religion in the social and cultural changes that the nation is currently undergoing. Finally, he realistically assesses the viability of the present government as a vehicle for economic development, stability, and reform.

Geometric Analysis of the Bergman Kernel and Metric-Steven G. Krantz 2013-09-20 This text provides a masterful and systematic treatment of all the basic analytic and geometric aspects of Bergman's classic theory of the kernel and its invariance properties. These include calculation, invariance properties, boundary asymptotics, and asymptotic expansion of the Bergman kernel and metric. Moreover, it presents a unique compendium of results with applications to function theory, geometry, partial differential equations, and interpretations in the language of functional analysis, with emphasis on the several complex variables context. Several of these topics appear here for the first time in book form. Each chapter includes illustrative examples and a collection of exercises which will be of interest to both graduate students and experienced mathematicians. Graduate students who have taken courses in complex variables and have a basic background in real and functional analysis will find this textbook appealing. Applicable courses for either main or supplementary usage include those in complex variables, several complex variables, complex differential geometry, and partial differential equations. Researchers in complex analysis, harmonic analysis, PDEs, and complex differential geometry will also benefit from the thorough treatment of the many exciting aspects of Bergman's theory.

Environmental Gerontology-Rick J. Scheidt 2013-09-13 Environmental gerontology - the research on aging and environment - evolved during the late 1960s, when the domain became a relevant topic due to societal concerns with the problems of housing for elderly people. The field proliferated during the 1970s and 1980s, and remains viable and active today on an international scale. However, in recent times, the viability of the field and its future has been brought into question. In this volume, international experts across diverse areas reflect on the current progress of their respective disciplines, illustrating research-grounded benefits emerging from their work, and suggesting new agenda that can guide progress in the future. The contributors address a wide range of issues, including: evaluation of existing paradigms and new theories that might advance both research and training; issues and applications in methods, measures, and empirically-generated research agenda; innovative approaches to environmental transformations in home, community, and long-term care settings; and understudied populations and issues in environmental gerontology. This book was originally published as a special issue of the Journal of Housing for the Elderly.

Culture Shock-Chip Ingram 2014-08-05 We live in a reactionary culture where divisive issues arise, people on either side throw stones, and everyone ends up more entrenched in their opinions than in reaching common ground--or even exhibiting common courtesy! If there ever was a time for Christians to understand and communicate God's truth about controversial and polarizing issues, it is now. Believers must develop convictions based on research, reason, and biblical truth--and be able (and willing) to communicate these convictions with a love and respect that reflects God's own heart. In Culture Shock, bestselling author, pastor, and radio personality Chip Ingram shows readers how they can bring light rather than heat to the most controversial and divisive issues of our day. Covering topics such as right and wrong, sex, homosexuality, abortion, politics, and the environment, Culture Shock is every engaged believer's must-have guidebook to replacing reactionary hate with revolutionary love.
