Question 7.

Vectors and Projectiles Review - with Answers #1

Vectors A, B, and C are added together as $A + B + C$. If the order in which they are added is reversed to $C + B + A$, then the result would be a vector with the same magnitude but the opposite direction. When constructing a vector diagram for $A + B + C$, it is not absolutely necessary that vectors B and C use the same scale that is used by vector A.
