

# Brasil Realistic Manual Do Exercito

**Slavery in Brazil**-Herbert S. Klein 2010 This is the first complete modern survey of the institution of slavery in Brazil and how it affected the lives of enslaved Africans. It is based on major new research on the institution of slavery and the role of Africans and their descendants in Brazil. This book aims to introduce the reader to this latest research, both to elucidate the Brazilian experience and to provide a basis for comparisons with all other American slave systems.

**American Military History, Volume II**- 2010 From the Publisher: This latest edition of an official U.S. Government military history classic provides an authoritative historical survey of the organization and accomplishments of the United States Army. This scholarly yet readable book is designed to inculcate an awareness of our nation's military past and to demonstrate that the study of military history is an essential ingredient in leadership development. It is also an essential addition to any personal military history library.

**Rio 2016**-Andrew Zimbalist 2017-09-12 A clear-eyed, critical examination of the social, political, and economic costs of hosting the 2016 summer Olympics The selection of Rio de Janeiro as the site of the summer 2016 Olympic Games set off jubilant celebrations in Brazil—and created enormous expectations for economic development and the advancement of Brazil as a major player on the world stage. Although the games were held without major incident, the economic, environmental, political, and social outcomes for Brazil ranged from disappointing to devastating. Corruption scandals trimmed the fat profits that many local real estate developers had envisioned, and the local government was driven into bankruptcy. At the other end of the economic spectrum, some 77,000 residents of Rio's poorest neighborhoods—the favelas—were evicted and forced to move, in many cases as far as 20 or 30 miles to the west. Hosting the games ultimately cost Brazil \$20 billion, with little positive to show for the investment. Rio 2016 assembles the views of leading experts on Brazil and the Olympics into a clear-eyed assessment of the impact of the games on Brazil in general and on the lives of Cariocas, as Rio's residents are known. Edited by sports economist Andrew Zimbalist, the other contributors include Juliana Barbassa, Jules Boykoff, Jamil Chade, Stephen Essex, Renata Latuf, and Theresa Williamson.

**Natural Resources, Neither Curse nor Destiny**-Daniel Lederman 2006-10-23 'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.

**The Official US Army Survival Guide**-U. S. Army 2020 This is THE indispensable survival guide for soldiers, preppers, hunters, hikers, and outdoor enthusiasts. Don't be confused by other versions which may have a higher page count. This version, published by Prepper Press, is complete, updated, and unabridged. It comes in a larger, easier-to-read 8.5x11" size and it has been professionally formatted for publication (no low-quality scanned pages). Written by the U.S. Army for soldiers, The Official US Army Survival Guide can be used by anyone in any part of the world. When soldiers go out, they expect to have all their personal equipment and unit members with them. However, there is no guarantee it will be so. Soldiers could find themselves alone in a remote area- possibly enemy territory-with little or no personal gear. This manual provides information and describes basic techniques that will enable individuals to survive and return alive. You will learn: Psychology of Survival Survival Planning and Survival Kits Basic Survival Medicine Shelters Water Procurement Firecraft Food Procurement Survival Use of Plants Poisonous Plants Dangerous Animals Field-Expedient Weapons, Tools, and Equipment Desert Survival Tropical Survival Cold Weather Survival Sea Survival Expedient Water Crossings Field-Expedient Direction Finding Survival Movement in Hostile Areas Camouflage Contact with People Survival in Man-Made Hazards Get this print version for easy reference and reading.

**U.S. Army War College Guide to National Security Issues: National security policy and strategy**-J. Boone Bartholomees 2012 Volume II continues the analyses and discussion of national security policy and strategy.

**Developments and Advances in Defense and Security**-Álvaro Rocha 2020-05-08 This book gathers the proceedings of the Multidisciplinary International Conference of Research Applied to Defense and Security (MICRADS), held at the Eloy Alfaro Military Academy (ESMIL) in Quito, Ecuador, on May 13–15,2020. It covers a broad range of topics in systems, communication, and defense; strategy and political-administrative vision in defense; and engineering and technologies applied to defense. Given its scope, it offers a valuable resource for practitioners, researchers, and students alike.

**Beach Management Tools - Concepts, Methodologies and Case Studies**-Camilo M. Botero 2017-12-04 This book provides an overview of beach management tools, including carrying capacity, beach nourishment, environmental and tourism awards (like Blue Flag or others), bathing water quality, zoning, beach typologies, quality index, user's perception, interdisciplinary beach monitoring, coastal legislation, shore protection, social and economic indicators, ecosystem services, and coastal governance (applied in beach case studies). Beaches are one of the most intensely used coastal ecosystems and are responsible for more than half of all global tourism revenues, and as such the book introduces a wide range of state-of-the-art tools that can be used to deal with a variety of beach challenges. Each chapter features specific types of tools that can be applied to advantage in beach management practices. With examples of local and regional case studies from around the globe, this is a valuable resource for anyone involved in beach management.

**Brazil and the United States during World War II and Its Aftermath**-Frank D. McCann 2018-08-24 The military alliance between the United States and Brazil played a critical role in the outcome of World War II, and yet it is largely overlooked in historiography of the war. In this definitive account, Frank McCann investigates Brazilian-American military relations from the 1930s through the years after the alliance ended in 1977. The two countries emerge as imbalanced giants with often divergent objectives and expectations. They nevertheless managed to form the Brazilian Expeditionary Force and a fighter squadron that fought in Italy under American command, making Brazil the only Latin American country to commit troops to the war. With the establishment of the US Air Force base in Natal, Northeast Brazil become a vital staging area for air traffic supplying Allied forces in the Middle East and Asian theaters. McCann deftly analyzes newly opened Brazilian archives and declassified American intelligence files to offer a more nuanced account of how this alliance changed the course of World War II, and how the relationship deteriorated in the aftermath of the war.

**The Origins of War in Mozambique**-Funada-Classen Sayaka 2012-04 "The independence of Mozambique in 1975 and its decolonisation process attracted world-wide attention as a successful example of 'national unity'. Yet the armed conflict that broke out between the government and the guerrilla force in 1977 lasted for sixteen years and resulted in over a million deaths and several million refugees, placing the notion of 'national unity' into doubt. For nearly twenty years, Sayaka Funada-Classen interviewed people in rural communities in Mozambique. By examining their testimonies, along with historical documents, previous studies, international and regional politics, and the changes that various interventions under colonialism brought to the traditional social structure, this book demonstrates that the seeds of 'division' had already been planted while the liberation movement was seeking 'unity' in the struggle years."--Back cover.

**US Army Survival Manual: FM 21-76**-United States Department of Defense 2016-04-27 This survival manual is organized as follows: Chapter 1. Introduction Survival Actions Pattern for Survival Chapter 2. Psychology of Survival A Look at Stress Natural Reactions Preparing Yourself Chapter 3. Survival Planning and Survival Kits Importance of Planning Survival Kits Chapter 4. Basic Survival Medicine Requirements for Maintenance of Health Medical Emergencies Lifesaving Steps Bone and Joint Injury Bites and Stings Wounds Environmental Injuries Herbal Medicines Chapter 5. Shelters Shelter Site Selection Types of Shelters Chapter 6. Water Procurement Water Sources Still Construction Water Purification Water Filtration Devices Chapter 7. Firecraft Basic Fire Principles Site Selection and Preparation Fire Material Selection How to Build a Fire How to Light a Fire Chapter 8. Food Procurement Animals for Food Traps and Snares Killing Devices Fishing Devices Preparation of Fish and Game for Cooking and Storage Chapter 9. Survival Use of Plants Edibility of Plants Plants for Medicine Miscellaneous Uses of Plants Chapter 10. Poisonous Plants How Plants Poison All About Plants Rules for Avoiding Poisonous Plants Contact Dermatitis Ingestion Poisoning Chapter 11. Dangerous Animals Insects and Arachnids Leeches Bats Poisonous Snakes Dangerous Lizards Dangers in Rivers Dangers in Bays and Estuaries Saltwater Dangers Chapter 12. Field-Expedient Weapons, Tools, and Equipment Clubs Edged Weapons Other Expedient Weapons Lashing and Cordage Rucksack Construction Clothing and Insulation Cooking and Eating Utensils Chapter 13. Desert Survival Terrain Environmental Factors

Need for Water Heat Casualties Precautions Desert Hazards Chapter 14. Tropical Survival Tropical Weather Jungle Types Travel Through Jungle Areas Immediate Considerations Water Procurement Food Poisonous Plants Chapter 15. Cold Weather Survival Cold Regions and Locations Windchill Basic Principles of Cold Weather Survival Hygiene Medical Aspects Cold Injuries Shelters Fire Water Food Travel Weather Signs Chapter 16. Sea Survival The Open Sea Seashores Chapter 17. Expedient Water Crossings Rivers and Streams Rapids Rafts Flotation Devices Other Water Obstacles Vegetation Obstacles Chapter 18. Field-Expedient Direction Finding Using the Sun and Shadows Using the Moon Using the Stars Making Improvised Compasses Other Means of Determining Direction Chapter 19. Signaling Techniques Application Means for Signaling Codes and Signals Aircraft Vectoring Procedures Chapter 20. Survival Movement in Hostile Areas Phases of Planning Execution Return to Friendly Control Chapter 21. Camouflage Personal Camouflage Methods of Stalking Chapter 22. Contact With People Contact With Local People The Survivor's Behavior Changes to Political Allegiance Chapter 23. Survival in Man-Made Hazards The Nuclear Environment Biological Environments Chemical Environments

**The Military and the State in Latin America**-Alain Rouquié 1987-01-01

**Advances in Safety, Reliability and Risk Management**-Christophe Berenguer 2011-08-31 Advances in Safety, Reliability and Risk Management contains the papers presented at the 20th European Safety and Reliability (ESREL 2011) annual conference in Troyes, France, in September 2011. The books covers a wide range of topics, including: Accident and Incident Investigation; Bayesian methods; Crisis and Emergency Management; Decision Making

**Developments and Advances in Defense and Security**-Álvaro Rocha 2019-06-13 This book gathers the proceedings of the Multidisciplinary International Conference of Research Applied to Defense and Security (MICRADS), held at the Military Engineering Institute, Rio de Janeiro, Brazil, from 8 to 10th May 2019. It covers a variety of topics in systems, communication and defense; strategy and political-administrative vision in defense; and engineering and technologies applied to defense. Given its scope, it offers a valuable resource for practitioners, researchers, and students alike.

**The Blue Shirts**-António Costa Pinto 2000 -- Patterns of Prejudice

**Narratives of Low Countries History and Culture**-Jane Fenoulhet 2016-11-07 This edited collection explores the ways in which our understanding of the past in Dutch history and culture can be rethought to consider not only how it forms part of the present but how it can relate also to the future. Divided into three parts - The Uses of Myth and History, The Past as Illumination of Cultural Context, and Historiography in Focus - this book seeks to demonstrate the importance of the past by investigating the transmission of culture and its transformations. It reflects on the history of historiography and looks critically at the products of the historiographic process, such as Dutch and Afrikaans literary history. The chapters cover a range of disciplines and approaches: some authors offer a broad view of a particular period, such as Jonathan Israel's contribution on myth and history in the ideological politics of the Dutch Golden Age, while others zoom in on specific genres, texts or historical moments, such as Benjamin Schmidt's study of the doolhof, a word that today means 'labyrinth' but once described a 17th-century educational amusement park. This volume, enlightening and home to multiple paths of enquiry leading in different directions, is an excellent example of what a past-present doolhof might look like.

**FM 21-76**- 2020-06-20 THE ORIGINAL US ARMY SURVIVAL MANUAL (FM 21-76) Modern combat increases the likelihood of your becoming isolated and having to find water, food, and shelter for many days--even weeks--while making it back to friendly forces. Small units fighting in widely dispersed formations or on special missions forward of friendly lines are more likely to be cut off than ever before. Large units traveling great distances by air and sea make survival in remote and desolate areas a real possibility for you. The ability to evade the enemy and to escape if captured, both basic requirements of the soldier's Code of Conduct, demands every survival skill you can master. The chances of being exposed to such an emergency are always present, especially when traveling, so survival techniques should be a part of your basic soldiering skills. This manual has been written to help you acquire these skills. It tells how to travel, find water and food, shelter yourself from the weather, and care for yourself if you become sick or injured. This information is first treated generally and then applied specifically to such special areas as the Arctic, the desert, the jungle, and on the ocean. Individual skills such as map reading, using a compass or other directional guide, scouting and patrolling, camouflage, first aid, sanitation, personal hygiene, and night vision provide a good foundation on which to build further survival skills. You should have a good general knowledge of them already, so they are repeated in this manual only as they apply to survival specifically. You can remain alive anywhere in the world when you keep your wits. This is a major lesson in survival. Remember that nature and the elements are neither your friend nor your enemy --they are actually disinterested. Instead, it is your determination to live and your ability to make nature work for you that are the deciding factors. CONTENT OF THE BOOK: Chapter 1. INTRODUCTION Section I. General Individual and group survival III. Health and first aid Chapter 2. ORIENTATION AND TRAVELING Section I. Navigation Selecting your route on the ground Chapter 3. WATER Section I. General considerations Finding water Chapter 4. FOOD Section I. General considerations Vegetable foods III. Animal foods Chapter 5. FIREMAKING AND COOKING Section I. Firemaking Cooking wild food Chapter 6. SURVIVAL IN SPECIAL AREAS Section I. General considerations Cold weather areas III. In jungle and tropical areas In desert areas At sea Chapter 7. HAZARDS TO SURVIVAL Appendix REFERENCES Index

**Cartridges and Firearm Identification**-Robert E. Walker 2012-11-26 At a time when crime scene television shows are all the rage amongst the civilian population, knowledge of firearm forensics is of paramount importance to crime scene analysts, police detectives, and attorneys for both the prosecution and the defense. Cartridges and Firearm Identification brings together a unique, multidisciplined approach to quest

**The Society of Reluctant Dreamers**-Jose Eduardo Agualusa 2020-03-10 Splitting through the clear waters beside the rainbow hotel, Daniel Benchimol finds a waterproof mango-yellow camera and uncovers the photographed reveries of a famous Mozambican artist, Moira. In this exquisite new novel, Agualusa's reader loses all sense of reality. In The Society of Reluctant Dreamers, Daniel dreams of Julio Cortázar in the form of an ancient giant cedar, his friend Hossi transforming into a dark crow, and most often of the Cotton-Candy-Hair-Woman, Moira, staring right back at him. After emails back-and-forth, Moira and Daniel meet, and Daniel becomes involved in a mysterious project with a Brazilian neuroscientist, who's creating a machine to photograph people's dreams. Set against the dense web of Angola's political history, Daniel crosses the hazy border between dream and reality, sleepwalking towards a twisted and entirely strange present.

**An Oral History of the Portuguese Colonial War**-Ângela Campos 2017-02-23 This oral history of ex-combatants of the Portuguese colonial war places the reader face-to-face with the men who were conscripted to fight the last and bloodiest of the West's colonial wars in Africa, namely in Angola, Mozambique and Guinea-Bissau (then Portuguese Guinea), between 1961 and 1974. At the forefront of this work are the lived experiences of a wide range of Portuguese veterans, framed by broader insights about the post-war public memory of this event in Portugal. Moving away from stereotypical and polarized images of these ex-combatants, An Oral History of the Portuguese Colonial War: Conscripted Generation explores the memories and consequences of this war for these veterans and their society. Seeking to understand why Portuguese ex-combatants often feel neglected and historically unrecognised, this book presents a thorough portrait of a continually shifting - and at times paradoxical -individual and collective remembrance process.

**Decolonising and Internationalising Geography**-Bruno Schelhaas 2021-08-14 International scholarship is increasingly aware that the 'geographical tradition' is a contentious and contested field: while critical reflections on the imperial past of the discipline are still ongoing, new tendencies including de-colonial studies and geographies of internationalism are focusing on the progressive aspects of plural geographical traditions. This volume contains selected papers presented at two Symposia of the Commission on the History of Geography of the International Geographical Union within the 25th International Congress of History of Science and Technology which took place in Rio de Janeiro in July 2017. The papers address processes of 'decolonising' and 'internationalising' science in the 19th and 20th century, with a special emphasis on geography. Internationalization, circulation and dissemination of geographical concepts and ideas are in the focus. The volume includes case studies on Latin America, tropical regions as well as Europe and Japan. There is also an emphasis on the history of international congresses and organizations and on the international circulation of knowledge.

**Cyberspace**-Phil Williams 2016 "This volume has three parts: the first focuses on cyberspace itself; the second on some of the major forms of malevolence or threats that have become one of its defining characteristics; and the third on possible responses to these threats. One of the most significant features of cyberspace, however, is that it is becoming a risky place for the entire spectrum of users: nation-states, nongovernmental and transnational organizations, commercial enterprises, and individuals. Yet it is a space of opportunities -- for benevolent, neutral, and malevolent actors. Moreover, the authors identify and assess the challenges and threats to security that can arise in cyberspace because of its unique nature. In the final section, the authors discuss a variety of responses, with some suggesting that the most favored options being pursued by the United States are poorly conceived and ill-suited to the tasks at hand"--Publisher's web site.

**The Atlantic Forest**-Marcia C. M. Marques 2021-01-13 The Atlantic Forest is one of the 36 hotspots for biodiversity conservation worldwide. It is a unique, large biome (more than 3000 km in latitude; 2500 in longitude), marked by high biodiversity, high degree of endemic species and, at the same time, extremely threatened. Approximately 70% of the Brazilian population lives in the area of this biome, which makes the conflict between biodiversity conservation and the sustainability of the human population a relevant issue. This book aims to cover: 1) the historical characterization and geographic variation of the biome; 2) the distribution of the diversity of some relevant taxa; 3) the main threats to biodiversity, and 4) possible opportunities to ensure the biodiversity conservation, and the economic and social sustainability. Also, it is hoped that this book can be useful for those involved in the development of public policies aimed at the conservation of this important global biome.

## Defense Issues-

**Senior Officer Talent Management**-Michael J Colarusso 2019-08-09 The Army has for years been successful at creating senior leaders adept in the art and science of land combat after honing their leadership at the direct and organizational levels. While those experiences remain invaluable, undue reliance upon them to create the Army's future institutional leaders is increasingly risky in today's rapidly changing world. The contemporary and future operating environments demand an innovative and highly adaptive Institutional Army, capable of rapidly responding to operational demands. Incremental adjustments to current senior officer management practices will not create that adaptability. An entirely new approach is required, one that unleashes the unique potential of each person-full-career officer talent management.

**Internet GIS**-Zhong-Ren Peng 2003-03-31 \* Provides case studies in each chapter illustrating how principles work in practice. \* Compares strengths and weaknesses of off-the-shelf software packages.

**The Struggle for Memory in Latin America**-Eugenia Allier-Montaña 2016-01-12 This book examines the struggles that unfolded in Latin America over the memory of the pasts of political violence experienced by the countries of the continent in the second half of the twentieth century: Argentina, Brazil, Chile, Colombia, the United States, Guatemala, El Salvador, Mexico, Paraguay, Peru, and Uruguay.

**Drug Policies and the Politics of Drugs in the Americas**-Beatriz Caiuby Labate 2016-07-30 This book is a collection of studies of drug policies in several Latin American countries. The chapters analyze the specific histories of drug policies in each country, as well as related phenomena and case studies throughout the region. It presents conceptual reflections on the origins of prohibition and the “War on Drugs,” including the topic of human rights and cognitive freedom. Further, the collection reflects on the pioneering role of some Latin American countries in changing paradigms of international drug policy. Each case study provides an analysis of where each state is now in terms of policy reform within the context of its history and current socio-political circumstances. Concurrently, local movements, initiatives, and backlash against the reformist debate within the hemisphere are examined. The recent changes regarding the regulation of marijuana in the United States and their possible impact on Latin America are also addressed. This work is an important, up-to-date and well-researched reference for all who are interested in drug policy from a Latin American perspective.

**Circus Maximus**-Andrew Zimbalist 2020-06-30 Beyond the headlines of the world’s most beloved sporting events Brazil hosted the 2016 men’s World Cup at a cost of \$15 billion to \$20 billion, building large, new stadiums in cities that have little use for them anymore. The projected cost of Tokyo’s 2020 Summer Olympic Games is estimated to be as high as \$30 billion, much of it coming from the public trough. In the updated and expanded edition of his bestselling book, Circus Maximus: The Economic Gamble Behind Hosting the Olympics and the World Cup, Andrew Zimbalist tackles the claim that cities chosen to host these high-profile sporting events experience an economic windfall. In this new edition he looks at upcoming summer and winter Olympic games, discusses the recent Women’s World Cup, and the upcoming men’s tournament in Qatar. Circus Maximus focuses on major cities, like London, Rio, and Barcelona, that have previously hosted these sporting events, to provide context for future host cities that will bear the weight of exploding expenses, corruption, and protests. Zimbalist offers a sobering and candid look at the Olympics and the World Cup from outside the echo chamber.

## U.S. Army War College Guide to National Security Policy and Strategy-

**Portuguese Africa and the West**-William Minter 1973

## Current Industrial Reports- 1964

**The Brazilian-American Alliance, 1937-1945**-Frank D. McCann Jr. 2015-03-08 Getúlio Dornelles Vargas established his dictatorship in Brazil in 1937, and from 1938 through 1940 American diplomats and military planners were preoccupied with the possibility that Brazil might ally herself with Nazi Germany. Such an alliance would have made fortress America vulnerable and closed the South Atlantic to Allied shipping. Fortunately for America, Brazil eventually joined the Allies and American engineers turned Northeast Brazil into a vast springboard for supplies for the war fronts. Frank D. McCann has used previously inaccessible Brazilian archival material to discuss the events during the Vargas regime which brought about a close alliance between Brazil and the United States and resulted in Brazil's economic, political, and military dependence on her powerful North American ally. He shows that until 1940 the drive for closer union came largely from Brazil, which wanted to offset the shifting alliances of the Spanish-speaking countries and escape from British economic domination. American interest in Brazil increased during the 1930's as the U.S. turned to Latin America to recoup losses in foreign trade and as Washington began to fear that Nazism and Fascism would spread to South America. By 1940 the nature of Brazil's relationship with the United States made it impossible for Brazil to remain neutral. Frank McCann's analysis of Brazil's decision to join the Allies affords a view of the diplomatic uses of economic and military aid, which became a feature of diplomacy in the postwar years. It also provides insights into the military's influence on foreign policy, and into the functioning of Vargas' Estado Nôvo. Originally published in 1974. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**History of Military Cartography**-Elri Liebenberg 2016-01-28 This volume gathers 19 papers first presented at the 5th International Symposium of the ICA Commission on the History of Cartography, which took place at the University of Ghent, Belgium on 2-5 December 2014. The overall conference theme was 'Cartography in Times of War and Peace', but preference was given to papers dealing with the military cartography of the First World War (1914-1918). The papers are classified by period and regional sub-theme, i.e. Military Cartography from the 18th to the 20th century; WW I Cartography in Belgium, Central Europe, etc.

**Big Water**-Jacob Blanc 2018-04-10 "A transnational approach to the history of a key Latin American border region"--Provided by publisher.

**Phylonyms**-Kevin de Queiroz 2020-04-30 Phylonyms is an implementation of PhyloCode, which is a set of principles, rules, and recommendations governing phylogenetic nomenclature. Nearly 300 clades - lineages of organisms - are defined by reference to hypotheses of phylogenetic history rather than by taxonomic ranks and types. This volume will document the Real World uses of PhyloCode and will govern and apply to the names of clades, while species names will still be governed by traditional codes. Key Features Provides clear regulations for implementing new guidelines for naming lineages of organisms incorporates expressly evolutionary and phylogenetic principles Works with existing codes of nomenclature Eliminates the reliance on rank-based classification in favor of phylogenetic relationships Related Titles: Rieppel, O. Phylogenetic Systematics: Haeckel to Hennig (ISBN 978-1-4987-5488-0) Cantino, P. D. and de Queiroz, K. International Code of Phylogenetic Nomenclature (PhyloCode) (ISBN 978-1-138-33282-9).

**Edge of Empire**-Maya Jasanoff 2007-12-18 In this imaginative book, Maya Jasanoff uncovers the extraordinary stories of collectors who lived on the frontiers of the British Empire in India and Egypt, tracing their exploits to tell an intimate history of imperialism. Jasanoff delves beneath the grand narratives of power, exploitation, and resistance to look at the British Empire through the eyes of the people caught up in it. Written and researched on four continents, Edge of Empire enters a world where people lived, loved, mingled, and identified with one another in ways richer and more complex than previous accounts have led us to believe were possible. And as this book demonstrates, traces of that world remain tangible—and topical—today. An innovative, persuasive, and provocative work of history.

**Paths to Victory**-Christopher Paul 2013 This companion volume to Paths to Victory: Lessons from Modern Insurgencies offers in-depth case studies of 41 insurgencies since World War II. Each case breaks the conflict into phases and examines the trajectory that led to the outcome.

**Autonomous Weapon Systems**-Jeffrey L. Caton 2016-03-31 What does the Department of Defense hope to gain from the use of autonomous weapon systems (AWS)? This Letort Paper explores a diverse set of complex issues related to the developmental, operational, legal, and ethical aspects of AWS. It explores the recent history of the development and integration of autonomous and semi-autonomous systems into traditional military operations. It examines anticipated expansion of these roles in the near future as well as outlines international efforts to provide a context for the use of the systems by the United States. As these topics are well-documented in many sources, this Paper serves as a primer for current and future AWS operations to provide senior policymakers, decisionmakers, military leaders, and their respective staffs an overall appreciation of existing capabilities and the challenges, opportunities, and risks associated with the use of AWS across the range of military operations. Emphasis is added to missions and systems that include the use of deadly force. AUDIENCE: This paper serves as a primer for current and future autonomous weapon system (AWS) operations to provide senior policymakers, decision-makers, military leaders and their respective staffs an overall appreciation for existing capabilities and the challenges, opportunities, and risks associated with AWS across the range of military operations. Emphasis is added to missions that include the use of deadly force. Additionally defense contractors and technology manufacturers may be interested in this work.
