Global Economic Prospects, June 2021-World Bank 2021-08-03 The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. The Most Important Thing-Howard Marks 2011-05-01 "This is that rarity, a useful book."--Warren Buffett Howard Marks, the chairman and cofounder of Oaktree Capital Management, is renowned for his insightful assessments of market opportunity and risk. After four decades spent ascending to the top of the investment management profession, he is today sought out by the world's leading value investors, and his client memos brim with insightful commentary and a time-tested, fundamental philosophy. Now for the first time, all readers can benefit from Marks's wisdom, concentrated into a single volume that speaks to both the amateur and seasoned investor. Informed by a lifetime of experience and study, *The Most Important Thing* explains the keys to successful investment and the pitfalls that can destroy capital or ruin a career. Utilizing passages from his memos to illustrate his ideas, Marks teaches by example, detailing the development of an investment philosophy that fully acknowledges the complexities of investing and the perils of the financial world. Brilliantly applying insight to today's volatile markets, Marks offers a volume that is part memoir, part creed, with a number of broad takeaways. Marks expounds on such concepts as "second-level thinking," the price/value relationship, patient opportunism, and defensive investing. Frankly and honestly assessing his own decisions--and occasional missteps--he provides valuable lessons for critical thinking, risk assessment, and investment strategy. Encouraging investors to be "contrarian," Marks wisely judges market cycles and achieves returns through aggressive yet measured action. Which element is the most essential? Successful investing requires thoughtful attention to many separate aspects, and each of Marks's subjects proves to be the most important thing.

The Unprecedented 2016 Presidential Election-Rachel Bitecofer 2017-10-10 This book explains the 2016 presidential election through a strategic focus. In the primaries both parties faced challenges from insurgent outsiders riding waves of populist fervor in the electorate, but only the Democrats were able to steer the nomination into the hands of their establishment favorite. Why

weren't Republican elites able to stop Donald Trump from hijacking their party's nomination? Why did Hillary Clinton come up short on Election Day despite the fact that nearly everyone expected her to win after her opponent ran a haphazard campaign plagued by scandal after scandal? The research presented here argues that the Clinton campaign conducted the nearly perfect execution of the wrong electoral strategy, costing her the Electoral College and her chance to become America's first female president.

Management and Gender in Higher Education-Pat O'Connor 2014-06-05 This book is a definitive examination of higher education: locating it in a wider neo-liberal context involving the state and the market, with a specific focus on recent higher policy and on the elite group of senior managers in universities. Written in a clear accessible style, it provides an in-depth analysis of university structures, cultures and practices at senior management level. Despite the managerialist rhetoric of accountability, we see structures where access to power is through the Presidents' 'blessing', very much as in a medieval court. We see a culture that is less than comfortable with the presence of women, and which, in its narratives, stereotypes and interactions exemplifies to a rather nineteenth-century view of women. Sites and sources of change are also identified. In a global context where diversity is crucial to innovation, it challenges us to critically reflect on management and on higher education.

The Future of Policing-Jennifer M. Brown 2013-10-08 The police service in England and Wales is facing major challenges in its financing, political oversight and reorganisation of its structures. Current economic conditions have created a wholly new environment whereby cost saving is permitting hitherto unthinkable changes in the style and means of delivery of policing services. In the context of these proposed changes Lord Stevens, formerly Commissioner of the Metropolitan Police Service was asked to chair an Independent Commission looking into the future of policing. The Commission has a wide ranging remit and the papers in this book offer up-to-date analysis of contemporary problems from the novel perspective of developing a reform agenda to assist the Commission. Bringing together contributions from both key academic thinkers and police professionals, this book discusses new policing paradigms, lays out a case for an evidence-based practice approach and draws attention to developing areas such as terrorism, public order and hate crime. Policing is too important to be left to politicians, as the health of a democracy may be judged by the relationship between the police and the public. The aim of this book is to question and present analyses of problems offer new ideas and propose realistically achievable solutions without being so timid as to preserve the status quo. It will be of interest to both academics and students in the fields of criminology and policing studies, as well as professionals in the policing service, NGOs and local authority organisations.

Army Readiness Reporting Systems, 1945-2003-William M. Donnelly 2018 "The U.S. Army before 1945 did not have and did not need a formal readiness reporting system. After World War II, however, it found itself committed to large-scale deployments in Europe and in the Pacific, commitments that with the Cold War would continue for the next 45 years. The demands of this war, along with the wars in Korea and Vietnam, made it vital that senior service leaders had accurate information on the readiness of units in the Regular Army, the Army National Guard, and the Army Reserve. The methods for measuring readiness, however, soon became and then remained a matter of contention. Equally contentious was the use of data generated by readiness reporting systems, both within the service and by others outside the service. The end of the Cold War did not end these disputes. Indeed, the years between that victory and the start of the second Iraq war in 2003 were a time of heightened concern over military readiness and how to assess it."--Provided by publisher.
