

Anatomy Skeletons For Sale

Bivalvia - Wikipedia

Bivalvia (/ b ar ' v æ l v i ə /), in previous centuries referred to as the Lamellibranchiata and Pelecypoda, is a class of marine and freshwater molluscs that have laterally compressed bodies enclosed by a shell consisting of two hinged parts. Bivalves as a group have no head and they lack some usual molluscan organs like the radula and the odontophore. They include the clams, ...

The Weird & Wonderful - American Express

As you share the beauty of nature through our products you can rest assured all our entomology is sustainably sourced whether it's framed butterflies, moth entomology or spiders. Working with Natural History and Taxidermy for over a decade, the wellbeing of our planet is important to us too.

Historical research design - SlideShare

Apr 03, 2017 · Historical sources of data are usually classified into two main categories: Primary sources: Primary sources are first hand information that include: Remains or relic associated with persons, groups, periods or events. Fossils, skeletons, tools, weapons, utensils, clothing, furniture, pictures, painting, coins and art objects are examples of

Amazon.com: Inside Your Outside: All About the Human Body

This is one of the most delightful human anatomy books for children that I've read. It doesn't dumb down the details just to sound cute ("in our stomachs there's food we ate three days ago"). I learned we have exactly 206 bones in human body and for the first time discovered, by manually counting with my children, that at least 96 of them
